#### SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT

#### MEMORANDUM

**DATE:** January 11, 1990  
**TO:** All Engineering Division Personnel  
**FROM:** William J. Dennison /s/ by WJD  
**SUBJECT:** Fees Applicable to Rule 219 Equipment

Rule 301.1 and 301.2 have recently been amended to assess reduced fees for equipment which was previously exempt by Rule 219, regardless of installation date. The following table shows the reduced fees.

The reduced Filing Fees will apply to all equipment which was exempt by Rule 219 prior to June 3, 1988. The excess filing fees will be credited to the applicant's account by Finance, so it is not necessary for the engineer to make fee adjustments on the Permit Wording and Fee Data sheet when processing the permit. The reduced Evaluation and Annual Operating Fees will apply only to previously exempt Rule 219 equipment listed in Rule 301.2 (a) (7) (A) (Amended January 5, 1989). Do not include the 50% penalty fee for equipment installed without permit to construct.

	FILING FEE	EVALUATION FEE	ANNUAL OPERATING FEE
Application filed before 06/05/89	\$75	\$150	\$87
Application filed after 06/05/89	\$100	\$150	\$87
